

Körnerpick Profi Breeding Plus

PROFI konzent

Complementary feed for chick and poult

Körnerpick Profi Breeding Plus completes the specific demand of young chick, to avoid high losses during the rearing period of chicken, ducks and goose. Especially in the first weeks of life, the supply of relevant nutrients such as vitamins (B-complex, A, D and E) and trace elements (manganese and zinc) are important for the chick's development.

A big challenge in this context is the not finally developed gut flora of young animals. Particularly stress or infections can lead to developmental disorders of the microbiom, which causes problems in digestion and intestinal absorption of nutrients. Furthermore it can result in a weakened immune system, as 70% of the chick's immune cells are located in the intestine.

Not every chick is able to compensate these problems with deficiency symptoms and / or insufficient immune defense what possibly causes losses in the breeding flock. For this reason the additional feeding of special concentrates like Körnerpick Profi Breeding Plus, help to strengthen young chick in growth, gut development and immune defence.

Our chick feed Körnerpick Profi Breeding Plus is based on 3 pillars:

- concentrated Vitamins and Trace Minerals for the ideal nutrition of young chick
- probiotic Bacteria support a sound and balanced development of gut flora and immune system
- essential Oils from Cinnamon and Oregano stimulate a balanced microbiom and have got appetizing effects

The benefits at a glance:

- the plus for chick rearing
- supports growth
- probiotic bacteria promote healthy intestinal flora
- also suitable for poultry such as geese & ducks

Feeding recommendation:

Within the first 14 days, we recommend to feed Körnerpick Profi Breeding Plus daily and reduce the feeding intervall afterwards to 2-3 times per week until the age of 6 weeks.

day 1-14: 25 g (approx. 4 heaped tablespoon) per 1 kg of feed or 1 L drinking water
from day 15: 2-3 x a week 25 g per 1 kg of feed or 1 L drinking water

If you add Körnerpick Profi Breeding Plus to drinking water, some insoluble sediments can be left on the bottom of the drinking trough. This does not affect feed properties. Körnerpick Profi Breeding Plus is a complementary feed which contains higher amounts of Vitamin A and trace elements according to complete feed. So the feed intake for chick and poult has to be limited according to the feeding recommendation above.

Složení: Maltodextrin, hroznový cukr, Whey powder (partially desugared, partially demineralized), chlorid sodný, Sodium bicarbonate

Analytické složky: 1,9 % Hrubý protein, 0,06 % Hrubé oleje a tuky, 0,2 % Hrubá vláknina, 9,1 % Hrubý popel, 1,67 % Sodík, 0,02 % Methionin, 0,09 % Lysin

Doplňkové látky na kg: 200.000 I.E. vitamin A (3a672a) ^{NA}, 50.000 I.E. vitamin D3 (3a671) ^{NA}, 150 mg Vitamin B1 (3a820) ^{NA}, 300 mg vitamin B2 (3a825i) ^{NA}, 1.000 mg Vitamin C (3a300) ^{NA}, 250 mg vitamin E (3a700) ^{NA}, 5.000 mg cholin chlorid (3a890) ^{NA}, 650 mg Niacinamid (3a315) ^{NA}, 150 mg kyselina D-pantothénová (3a841) ^{NA}, 500 mg Vitamin K3 (3a710) ^{NA}, 1.280 mg mangan jako síran manganatý monohydrát (3b503) ^{NA}, 750 mg chelátová forma zinku, hydrát (v pevné formě) (3b607) ^{NA}, 2x10¹⁰ KBE Bacillus subtilis C-3102 (DSM 15544) (4b1820) ^{ZA}, 300 mg Zimtaldehyd (Flavis No.05.050) ^{SA}, 300 mg Carvacrol (Flavis No. 04.031) ^{SA}, 120 mg Capsicum oleoresin (CoE 108) ^{SA}
