

Volaris MEHLWÜRMER getrocknet

Wild Bird Feed

Einzelfuttermittel für freilebende Vögel

Doporučené dávkování:

Dried Mealworms can be added daily to your regular feeding station. If you want to attract your small garden visitors with an extra tasty treat, soak some mealworms in water overnight and offer it the next day to the birds. Only consider, that you have to clean up the rest next day after, as soaked Mealworms will rot faster than dried ones.

Složení: 100 % Mealworms dried
